Post & Rail Fencing

Tarmac post and rail fencing is made from Australian grown radiata pine using the latest industry leading technology.

This technology is designed to extend the life of wood, our EcoWood Green & Tinted treatments are perfect for those environmentally sensitive outdoor applications.

Tarmac post and rail fencing is ideal for drive way entrances, livestock enclosures, horse yards and more.

Elevate your property's appearance and long term value with Tarmac Timbers premium post and rail fencing options.

Simply let one of our stockist know how many middle, end, and corner posts are required for your project, and we can make to order.

About Tarmac Post & Rail Fencing

Make an impression that lasts with EcoWood Tinted and Green treated Timber.

- Rails butt together inside the mortice and do not require fixings.
- Incorporate electric or wire with our post and rail fencing to create a secure stock / pet proofing solution.
- Proven protection from insects and decay.
- Recommended post spacings every 2.4 meters apart.
- Available in one, two, three and four rail systems.

Post & Rail Maintenance

To ensure your fence maintains its original appearance and condition, it is recommended to use an universal timber oil on all fence rails and posts. This will help prevent the timber from warping, cupping and splitting over time, much like any outdoor timber deck or pergola structure.

Please refer to our installation guides for more information.
